***Response to Amendment***

1. The amendment filed on January 30, 2004 has been entered.
2. The drawing filed on January 30, 2004 has been entered.

***Allowable Subject Matter***

3. Claims 1-8 and 10 are allowed.
4. The following is an examiner's statement of reasons for allowance:

Regarding claims 1-2 and 4-7, none of the prior art of record discloses an x-ray detector that includes an evaluation unit that has a pair of parallel channels (integrator and parallel channels) that concurrently process information from the integrator and counter channels.

Although references like Valenta (cited in previous office action) disclose many of the necessary elements, Valenta does not process the information from both the channels concurrently.

Regarding claim 3, none of the prior art of record specifically discloses an x-ray detector that has a data processing unit that gives more weight to signals from the integrator output during high absorption rates and gives more weight to signals from the counter output during low absorption rates. Valenta does disclose many of the necessary elements, but does not specify that there is a specific weighting factor as disclosed in the instant application.

Regarding claims 8 and 10, although Valenta discloses some of the steps and elements required in the present invention, none of the prior art of record discloses the specific method of evaluation absorption signals as disclosed in the present invention; namely that after the mean absorption energy is determine in a given time interval, it is then compared to the original spectrum of the x-ray source.

Art Unit: 2878

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
